DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 2. Claims 1, 7, 9 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson 6,171,354, in view of Catron et al. 4,340,402 or Lakatas et al. 4,105,423.
- 3. All references have been discussed previously. Johnson discloses a pressure sensitive adhesive optionally containing an odor neutralizer. See claims 1 and 14. The secondary references show the equivalence of pressure sensitive and hot melt adhesives in air filters. Optional components are permitted in an obviousness rejection. Neutralizing the odor present in the adhesive is the intended use and such it has no patentable significance. Applicants are claiming a composition and the odor neutralizer just have to present in the adhesive. Where the odor comes from is immaterial. The rejection is maintained.
- 4. Claims 1-3, 6-13, 16-23 and 25-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sekisui Chem. Co. JP-3-170575, Univ. Jilin CN 1401724 or Yazaki Corp. JP-2002-180026.
- 5. All references have been discussed already previously. The examiner holds that any material, which deodorizes without masking the malodor with another scent, qualifies as an odor neutralizer. Accordingly, cyclodextrin, nonofillers and carbon-carrying acid clay are odor neutralizers. Neutralizing the odor present in the adhesive due to the tackifier is the intended use. Using a hot melt adhesive in books, diapers etc.

is well known. What applicants need for patentability is the composition of the odor neutralizer. The rejection is maintained.

Claim Objections

6. Claim 11 is objected to because of the following: The claim does not say what the neutralizer is neutralizing. A buffer is a neutralizer. Appropriate correction is required.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
